---

**Strategic Technology Rescuer** with over 25 years of rescuing mission-critical projects, bringing order to process chaos, creating joyful experiences for users, and thrusting companies to greater profitability.

---

## Selected Notable Adventures

---

- ★ **Band-aids on a Battleship** – RLLCO’s flagship GMS Application was dying the death of 1,000 cuts, but my *Mushroom Cloud Error Handling* code plugged the holes and captured insights into legacy programming issues (which I fixed, too, while implementing new features for the business).
  - ★ **Supersonic feedback** – GMS data entry and reporting were killing quality—and customers were threatening to quit—but my *Quick Reports* and instantaneous *Business Rules* kick-started quality back onto the rails and restored customer confidence. (And users loved them both!)
  - ★ **4-D chess** – GMS sales allocation was buggy, slow, and inscrutable—causing accounting nightmares on tight deadlines—but my *Sales Allocation System* rebuilt it with a rock-solid foundation and a bullet-proof audit trail.
  - ★ **Clone Army (on Demand)** – Pfizer needed to process mountains of biometric device data, so I architected a *Massively Scalable Pipeline* that churns through 1,000+ monster data files in 30 minutes or less. (And then scales back down to zero. Huzzah!)
  - ★ **“Not the droids you’re looking for”** – PwC’s microservices development was all over the map, so I constructed the *Astromech Developer Platform* to enforce code quality and consistency, all running in-cluster (with GitHub Actions). Astromech runs all CI/CD in parallel, for any number of microservices Products, resulting in the fastest possible iteration cycles.
- 

## Experience

---

PriceWaterhouseCoppers (via InsightGlobal)	2022 to now
<b>Senior Cloud Automation Architect Consultant</b>	
Interos, Inc.	2021 to 2022
<b>Senior Cloud Solutions Developer Consultant</b>	
Pfizer, Inc. (via The Judge Group)	2020 to 2021

<b>Senior AWS Solutions Developer Consultant</b>	2019 to 2020
SAP NS2 (via Insight Global)	
<b>Senior AWS Automation Engineer Consultant</b>	2018 to 2019
Rackspace, Inc. (via NJTech Staffing)	
<b>Cloud Integration and Senior SAML Consultant</b>	2015 to 2018
Soltra Solutions, LLC/NC4 Soltra, LLC	
<b>Senior Full-stack User Experience Engineer</b>	2013 to 2015
